📘 Project Report: Digital Literacy Portfolio

Course: CSE0001 - Digital Literacy

Student Name: Shreya Arora | Reg. No: 25BCE10621

Institution: VIT Bhopal University

Date: March 29, 2026

---

1. Introduction

As a newly selected Student Digital Ambassador, my mission is to guide my peers through the professional and safety-critical aspects of the digital landscape. This portfolio serves as a centralized resource for my batch, documenting the transition from a standard student profile to a professional online presence. By organizing these modules within a GitHub repository, I am demonstrating the core competencies required for modern digital citizenship and academic collaboration.

2. Task 1 Write-up: Digital Literacy Awareness Infographic

- **The Resource:** I developed a one-page visual infographic designed to help batchmates define digital literacy and adopt safe internet practices.
- **Technical Approach:** I utilized **Canva** to ensure a professional and accessible design layout.
- **Reflection:** The most interesting part of this task was condensing complex security topics into a visual format that remains engaging without sacrificing clarity. Balancing icon-based navigation with essential text was a key learning moment in visual communication.

3. Task 2 Write-up: Build Your Student Digital Portfolio

- **The Platforms:** I established a foundational presence on **GitHub, LinkedIn, and Kaggle**.
- **Architecture:** On GitHub, I initialized a profile README featuring my academic credentials and my primary learning goal. On LinkedIn, I updated my education section to reflect my status at VIT Bhopal.
- **Future Strategy:** These platforms will act as a live record of my B.Tech journey. I plan to use GitHub for version control in coding projects and LinkedIn to connect with industry experts and internship coordinators.

4. Task 3 Write-up: Explore Coding & Collaboration Platforms

- **Execution:** I successfully completed a beginner-level Python introduction challenge on **HackerRank** to verify my technical literacy.
- **Collaboration:** I engineered a "Digital Literacy Awareness Quiz" using **Google Forms**, featuring five targeted questions for peer assessment.
- **Academic Value:** These tools are vital for my degree. Coding platforms provide rigorous practice for my AI/ML coursework, while Google Workspace enables efficient, real-time data collection and collaboration for group projects.

5. Task 4 Write-up: Draft a Professional Email & Etiquette Guide

- **Scenario Analysis:** I drafted two professional emails—one for an assignment extension and another for an internship inquiry—focusing on tone, structure, and proper salutations.
- **Communication Reflection:** I analysed a situation where poor email clarity led to missed academic deadlines. I learned that a clear subject line and professional greeting are the most critical factors in ensuring a message is prioritized by a recipient.

6. Task 5 Write-up: Cybercrime Awareness Case Study & Prevention

- **Research Findings:** My case study on **Phishing** revealed how sophisticated social engineering attacks have become, specifically targeting students through fake "urgent" academic alerts.
- **Behavioural Change:** I was surprised by the volume of fraudulent academic emails reported globally. Consequently, I have adopted the habit of manually verifying URL origins rather than clicking links directly from email bodies.

7. Conclusion

This project has significantly enhanced my understanding of what it means to be a professional in the digital era. Beyond technical skill, I have learned the value of professional etiquette and the critical importance of maintaining a secure online footprint. As a Digital Ambassador, I am now better equipped to support my peers in safely and effectively utilizing the tools that will define our academic and professional success.
